

Heimsframboð samkeppnistegunda Íslands

Tegund: **Sæbjúgu (brimbútur)**

Sea cucumbers, Japanese sea cucumber | Cucumaria frondosa, Apostichopus japonicus

FACTSOFSEAFOOD

kh@factsofseafood.com

Árleg veiði hefur verið um 40.000 tonn síðustu árin. Stærstu veiðipjóðir eru Kanada, Japan, Rússland og Indónesía, þar á eftir kemur Ísland í fimmta sæti árið 2016. Japan hefur lengi verið stærsti framleiðandinn, en frá 2006 hefur Kanada bæst í hópinn og Rússland eingöngu frá 2015. Frá 2000 hafa veiðar við Bandaríkin og Ástralíu fallið verulega.
